PROJECTS

Weather App Project

2024

<https://github.com/obay123/Weather-App>

Project focused on developing a weather website , The website gets the city name from the user and sends it as a variable to an API . Fetches the data from the API and shows the results in a well-designed way.

Expense Tracker

2024

https://github.com/obay123/Expense_Tracker

Project focused on developing an expense tracker website using HTML ,CSS and javascript . The website features integration with local storage , allowing users to add, delete and edit expenses and income entries . Additionally , users can view expense and income history through a table display.

portfolio

2024

https://github.com/obay123/Personal_Portfolio_Website

Project focused on developing my portfolio website . The website serves as a comprehensive showcase of my services, skills, education, projects and includes contact section. It was built by using React and tailwind CSS , with a key emphasis on ensuring full responsiveness across various devices and screen sizes.
